Polarn Compact heater 4000

Polarn compact heater is the portable and flexible hot air unit adapted to work within, for instance, electricity and telecommunication and the rescue services. The heater is very suitable for heating work- and protective tents of all sizes and as emergency heating for vehicles damaged in a collision. The heater is an important tool in the struggle to save lives in accidents in cold weather. It is also suitable when drying cables, etc.

Polarn compact heater is complete with a fuel tank, an exhaust tube and a cable for connection to a battery box, a converter, a power station 12V or 220V. High dependability is guaranteed because the unit has a built in diagnose system which indicates the operating circumstances. To invest in a Polarn compact heater is worthwhile, not only for the low cost of operating but also for the saving of time in repairs and rescue work.
